American Association of Nurserymen

TO OUR CUSTOMERS

The business you have given us in the past is sincerely appreciated, it has been a factor in our efforts of propagating and producing better quality plants. We will continue to do our best to serve you well.

Strong early demand this year, has sharply reduced our salable inventory. Many prime items are sold out. We can serve you better if you will write us about your needs early.

First time customers are always welcome—it takes new customers to make old customers. We want you to do business with us in a mutual profitable and friendly way.

Cordially yours,

BROOKFIELD GARDENS

Delaware, N. J.

LINING OUT STOCK

ILEX CRENATA (Japanese Holly)

Demand is constantly increasing for this item. It is tolerant of various soils, easy to grow, faster to finish than Box or Taxus and Versatile. Our larger sizes are excellent for re-sale in containers or for finishing quickly in the field rows. We have over 20,000 of 3 and 4 year plants produced from seeds of Convexa which reverted to many variations mostly with small shiny dark green, cerated leaves, very attractive. They look like there will be many beautiful and unusual types in this lot.

			Each	
				Per 100 1000
4 yr. XX	Field Heavy	12-15"	.50	.45
4 yr. X	Field Heavy	8-12"	.40	.35
3 yr. X	Field Beds	6-9"	.12	.09
3 yr. X	Field Beds	3.M.	\$240.00	

ILEX CRENATA MICROPHYLLA

(Small leaf Holly)

Produced from Microphilla Seeds. This lot appears to be remarkably true to form.

3 yr. X	Field Beds	4-8"	.12	.09
3 yr. X	3M.	\$240.00		

ILEX CRENATA CONVEXA (Bullata)

Small convex shiny dark-green leaves and black berries. Most attractive. Excellent low foundation plant, much in demand.

2 yr. X	Field Beds	4-6"	.15	.12
2 yr. X	Field Beds	6-8"	.25	.20
2 yr. X	Field Beds	8-10"	.30	.25

ILEX CRENATA ROTUNDIFOLA

(Round Leaf Holly)

Compact plant with shiny green foliage and black berries. The most popular variety of Crenata.

XX	Field Beds	6-8"	.25	.22
----	------------	------	-----	-----

ILEX OPACA (American Holly)

Seedling Grown Twice Transplanted

5" Pots 8-15" ----- .50 .45

PIERIS JAPONICA (Japanese Andromeda)

The lily of the valley shrub, with its lustrous evergreen foliage and pendulous waxy white flower clusters, is as beautiful an evergreen as it is possible to grow.

1 yr. X	Frames	.15	.12
2 yr. XX	Field Beds 4-6"	.25	.22
3 yr. XX	Field Beds 6-8"	.35	.30
3 yr. XX	Field Beds 8-10"	.45	.40
3 yr. XX	Field Beds 10-12"	.60	.55
4 yr. XXX	Field Beds 12-15"	1.00	
5 yr. XXX	Field Beds 12-15"	each 1.50	
5 yr. XXX	Field Beds 15-18"	each 2.00	

TAXUS LINERS

Sold out for Spring 1956. Many more are coming along in various stages of growth for future sales.

10,000 in the following varieties will be available for early Fall Planting 1956.

CORNUS FLORIDA (White Fl. Dogwood)

(Nursery Grown Transplants)

3 yr. X 2 to 3 ft. BR. ----- .50 .45

3 yr. X 3 to 3½ ft. BR. ----- .75 .70

TAXUS CUSPIDATA DENSA

(The Cushion Japanese Yew)

Very slow growing, low form, dwarf compact rounded or globose type, with distinctive ascending branchlets. It grows naturally broader than high. The foliage is extremely dark green throughout the year. It is an excellent landscape plant. The most attractive, dwarfiest type, Taxus known and one of the hardiest.

We have 400 of these splendid little specimens.

7 years old, three times transplanted.

10 to 12" B & B ----- Each 1.35

12 to 15" B & B ----- Each 1.75

DECIDUOUS AZALEAS

They are about the only reliably hardy Azaleas for landscape planting in the colder areas of U. S. They are natives of America and northern Asia. All in our list are nursery grown from seeds. Propagation from cuttings is quite difficult.

AZALEA ARBORESCENSE (Sweet Azalea)

A handsome plant with particularly attractive lustrous foliage that becomes bronze-colored in Autumn. The white flowers open in June and July and are delightfully heliotrope-scented. Extremely hardy and valuable for northern planting.

2 yr. XX Bed Grown ----- .30 .25

AZALEA MOLLIS (Chinese Azalea)

Very hardy. Blooms before leafing. Foliage bright green and attractive, turning to gorgeous shades of bronze and red in the fall. Flowers are large and borne in great profusion, variable colors, Salmon, Orange to Red.

3 yr. XX Field Beds 6-10" ----- .40 .35
2 yr. XX Field Beds 6-8" ----- .25 .22
5 yr. XXX Field Rows 9-12" each 1.25
5 yr. XXX Field Rows 12-15" each 1.50

AZALEA MUCRONULATUM

(Early Bloomer)

Pleasing rose-purple flowers with waxed margins cover the whole plant. Mucronulatum forces readily and its free blooming habit adds greatly to its value. It is a native in cold parts of northeastern Asia (Siberia, Korea and China) and is therefore adapted for garden use in America in locations with similar climate.

3 yr. XX Field Beds 12-15" ----- .60 .55
3 yr. XX Field Beds 8-12" ----- .50 .45

These are nice plants with multiple canes. Heavily rooted and come with generous soil ball. (not B & B)

AZALEA VASEYL (Pink Shell Azalea)

One of the finest American Azaleas. It begins to flower when very small. The flowers open in May and are pink or light rose colored with reddish-orange dots at the base of the upper petals. The foliage is bright green, clean and attractive, turning brilliant crimson in the Autumn. Vaseyl is very hardy and well adapted to colder parts of the country.

3 yr. XX	12-15"	-----	.55	.50
3 yr. XX	8-12"	-----	.45	.40

AZALEA SCHLIPPENBACHI (Royal Azalea)

Seeds of this gorgeous Azalea were collected in Korea in 1918 by the world famous plant hunter Dr. E. H. Wilson and distributed by the Arnold Arboretum. Schlippenbachi is a hardy variety adapted to the colder areas of the U. S. The rose pink flowers open in May. The dark green leaves are unusual and outstanding in both size and shape for an Azalea. Up to 4" long and 3" wide. The fall coloring of the foliage is brilliant.

2 yr. X	Liners 3-4"	-----	.25
5 yr. XXX	10-12" Field Rows	B & B ea.	1.50
5 yr. XXX	12-15" Field Rows	B & B ea.	1.50

AZALEA CAENDULACEUM

(Flame Azalea)

This splendid plant is rightfully included in the best half-dozen hardy American Azaleas. It blooms in May and June. The flowers are large 1½ to 2" in fine range of colors — Yellow, Orange to Red, often with blotches on upper petals.

12-18" XXX Field Rows B & B each 1.75

20,000 3-yr. XX Field Beds will be available for Fall planting 1956 in the following varieties of Deciduous Azaleas:

azalea calendulacea (var. *calendulacea*)

CALENDULACEUM

azalea arborea (var. *arborea*)

ARBORESCENSE

azalea nudiflora (var. *nudiflora*)

NUDIFLORUM

azalea mollis (var. *mollis*)

MOLLIS

azalea vaseyl (var. *vaseyl*)

VASEYL

MISCELLANEOUS LANDSCAPE STOCK

Odd lots of various size. Mostly 1½ to 3 ft. that we want to move. Need the space for lining out. First class stock, B & B except where indicated.

- 50 MAGNOLEA STELLATA

- 60 HYDRANGEA P.G. Heavy BR.
- 100 DWARF ARCTIC BLUE LEAF WILLOW BR.
- 500 CORNUS FLORIDA (White) BR. 2-3'
- 15 CORNUS FLORIDA RUBRA 3-4' B & B

BROOKFIELD GARDENS

Delaware, N. J.

—MEMO—

INFORMATION

We propagate and grow first quality stock for wholesale only, mostly Evergreens.

We specialize in ILEX TAXUS, PIERIES DECIDUOUS AZALEAS Dogwood, etc.

All stock offered for sale is grown out of doors in our own irrigated fields with the greatest of care and packed in like manner.

We are located in the coldest area of Northern New Jersey, winter temperatures at Brookfield Gardens normally drop down to zero and often 10 to 20 degrees below. Our plants are therefore, well adapted for planting in locations with a similar climate.

LOCATION OF NURSERY

We are situated 75 miles northwest of New York; 72 miles north of Philadelphia; 7 miles south of Delaware Water Gap. On Old Columbia Road, Route 46 and Delaware River, one-third mile west from the Post Office of Delaware, N. J.
